

1. Hidden Markov Models: Instructions

When you're ready to submit your solution, go to the [assignments list](#).

Assignment instructions:

- You are free to use any programming language you wish. The sample code is in Python, but you will not need to call it from your code.
- You can use external libraries, but do **not** use NLP libraries such as NLTK.
- Be careful about your output. Make sure you remove any debug print statements before submitting.
